REMARKS

The enclosed is responsive to the Examiner's Office Action mailed on April

28, 2010. By way of the present response applicants have: 1) amended claims 1-

31; 2) added no claims; and 3) canceled no claims. Applicants have amended the

Specification to correct typographical errors. No new matter has been added.

Reconsideration of this application as amended is respectfully requested.

Objection to the Specification

The Examiner objected to the Specification as lacking headings for

subsections, such as, e.g., Background, Summary, etc. Applicants respectfully

disagree with the Examiner that the appropriate headings are lacking. Applicants

direct the Examiner's attention to the Preliminary Amendment filed January 6, 2006

that included amendments to the Specification to add these headings. Accordingly,

applicants respectfully submit that the objection to the Specification has been

overcome.

Claim Rejections – 35 U.S.C. § 101

Claims 1-18 and 24-27 stand rejected under 35 U.S.C. § 101 because the

claimed invention does not fall within one of the four statutory categories of

invention. In particular, the Examiner indicated that the rejected claims are not tied

to a particular machine or transform a particular article. Applicants respectfully

submit that the machine or transformation test is no longer the sole test for

patentability and that the rejected claims are not drawn to an abstract idea. In the

Inventor(s): Karin Donner, et al. Examiner: Bhatnagar, Anad P. Application No.: 10/563,746 Art Unit: 2624 interest of furthering prosecution, however, applicants have amended claims 1-18

and 24-27 to recite computer-implemented methods that are tied to a computer.

Accordingly, applicants respectfully submit that the rejection of claims 1-18

and 24-27 has been overcome.

Allowed Subject Matter

The Examiner's allowance of claims 19-23 and 28-31 is noted with

appreciation.
